

Fire, Water, Smoke, Flood Damage Emergency Response

When a loss to College property occurs on campus, regardless of what time of day or day of the week it is, please contact the State College Risk Manager (24/7 at 856-229-3949)

A quick response to fire, water and smoke damage, flooding or sewer overflow can minimize claim costs. Extracting water, sanitizing and cleaning as soon as possible following the discovery of the loss is essential to preventing permanent damage to wood, carpet and tile flooring while minimizing or eliminating potential mold or other biological problems.

Shop vacuums and other equipment typically available to your facilities department and maintenance contractors **will not** typically do the job, nor is the staff trained to respond in the most appropriate manner. Commercial grade extractors and dehumidifiers are necessary. The following list of contractors can provide the equipment and technicians needed for the job.

Either the College or the State College Risk Manager should contact one of the following vendors as soon as possible after becoming aware of a loss. The sooner they are contacted the sooner they can respond and the sooner you will be on your way to recovery and having your operations restored to normal.

Contractors

BMS Cat	800-433-2940
BPR	800-744-0399
Ins. Restoration Specialist	800-634-0261
